

SAURABH RANJAN

Gainesville, FL, U.S.A. • saurabhr.neuroai@proton.me • saurabhr.github.io

[GitHub](#) • [LinkedIn](#) • [Blue Sky](#) • [X](#) • [ORCID](#)

Ph.D. Cognitive Neuroscientist | Cognitive and Machine Psychology | Human-AI Alignment | NeuroAI

EDUCATION

Ph.D. Psychology — Behavioral & Cognitive Neuroscience University of Florida, USA | 2025

Dissertation: [Reality Monitoring in Humans and Artificial Intelligence](#)

M.Sc. Cognitive Science University of Allahabad, India | 2018

Thesis: [Intentional Binding in Future-Directed Intentions](#)

B.Sc. Physics Birla Institute of Technology, Mesra, India | 2016

TECHNICAL SKILLS

AI/ML & LLMs: Agentic workflows (LangChain/LangGraph), LLM evaluation & hallucination-detection pipelines, prompt engineering; PyTorch, Hugging Face, scikit-learn, Pydantic

AI Tooling & Infra: Claude Code (agent testing/tooling), Psych Scanner, MetaSignal, Read the Docs

Interpretability & NeuroAI: Representation probing, encoding models, MEG/EEG (MNE), fMRI (Nilearn/SPM), UK Biobank predictive modeling

Stats & Evaluation: Bayesian hierarchical modeling (PyMC, brms), signal detection theory, mixed-effects models (lme4), metacognitive modeling

Data Engineering & MLOps: Python, R, MATLAB, Bash; Pandas, NumPy, Git/GitHub, Docker, SLURM/HPC

Visualization: seaborn, matplotlib, plotly, ggplot2

RESEARCH EXPERIENCE

Researcher — AI for Biomedical Health Outcomes 2026 – Present

University of Florida, Gainesville, FL

- Co-develop UF's Master's-level curriculum on Data Science and Agentic LLMs for AI for Biomedical Health Sciences (AIBHS), spanning Foundations, Clinical Application, and Basic Science tracks — contributing to UF's [#1 AI-readiness ranking among large public universities](#) (AIREDEX, 2026); built and maintain the [AIBHS Faculty Hub](#) and [AI Passport Impact Project](#) sites (20 hands-on modules).
- Build agentic AI systems (planning, reflection, tool use) for clinical decision-making on reproducible pipelines (PyTorch, LangChain/LangGraph, SLURM/HPC); extended this into [Psych Scanner-Primal](#), an optimized fork of Psych Scanner for the Prime Intellect Environments Hub, evaluating agentic systems under Reinforcement Learning with Verifiable Rewards (RLVR).

Research Assistant 2025 – 2026

Dr. Andreas Keil's Lab, University of Florida, Gainesville, FL

- Continued development of [Psych Scanner](#), advancing it from version 0.1.0 to version 0.4.0 — automating out-of-distribution (OOD) evaluation of LLMs using [800+](#) cognitive tasks and giving researchers a flexible, reproducible pipeline for running both standard and boutique cognitive paradigms.

Graduate Researcher 2020 – 2025

Dr. Brian Odegaard's PAC-Lab & UF Department of Psychology, Gainesville, FL

- Discovered that LLM source-attribution accuracy reverses under episodic memory delay, tested across 2 experiments and 6 transformer-based LLMs (Gemma3, Llama3.3, Llama4) — a hallucination-relevant failure invisible to single-turn benchmarks.
- Found that corrective feedback produces two distinct metacognitive failure modes, with failure severity tracking active rather than aggregate parameter count — a chain-of-thought-relevant self-knowledge gap that worsens, not improves, with scale (preprint, arXiv:2607.23927).
- Built psychological network models from 2,743 human participants and 6 LLMs (12B–272B parameters): human representational structure replicates across populations ($r = 0.31\text{--}0.93$) while no LLM tested reproduces it at any scale, suggesting a world model can be characterized purely from the structural relationships between internally generated experiences.
- Designed and ran matched experiments with 100+ human participants and parallel LLM simulations to test generalization of reality monitoring across task constraints, complemented by [MEG temporal generalization](#) decoding and [fMRI encoding models](#) predicting fMRI response from image memorability (NSD dataset) — the same seen-vs-imagined question, in humans.
- Authored [Psych Scanner](#) (v0.0.1) solo, an open-source framework for running cognitive experiments on LLMs at scale, and built [MetaSignal](#), a Python package for metacognitive/signal-detection analysis.
- Mentored 7 undergraduate researchers and taught a full segment of Physiological Psychology.

Research Assistant 2019 – 2020

Center of Behavioral and Cognitive Sciences, University of Allahabad, India

- Found stronger intentional binding — a measure of sense of agency — for predictive intermediate outcomes than non-predictive ones, replicated across three delays (300/500/700ms) and two contingency levels ([OSF preprint](#)).

Research Assistant 2018

Homi Bhabha Centre for Science Education, TIFR, Mumbai, India

- Contributed statistical analysis for Touchy-Feely Vectors (TFV), a gesture-based tool for teaching vectors, across two studies: a 266-student pilot (3 experimental, 3 control classrooms) where the experimental group reasoned differently about vectors and showed higher engagement ([IEEE T4E 2019](#)), and a 3-year field study (135 control vs. 131 experimental students) showing improved model-based reasoning in stronger students and engagement in average ones ([Journal of Computer Assisted Learning, 2021](#)).

AWARDS & FELLOWSHIPS

- 2025 — College of Liberal Arts and Sciences Travel Award, University of Florida
- 2025 — Threadgill Dissertation Fellowship, University of Florida
- 2024 — Scott O. Lilienfeld APS Travel Award, Association for Psychological Science
- 2024–2025 — UF Department of Psychology Travel Awards ($\times 4$)
- 2020–2025 — Graduate Student Fellowship, UF Department of Psychology
- 2016–2018 — Graduate Merit Scholarship, Centre of Behavioral & Cognitive Sciences, University of Allahabad
