

SAURABH RANJAN

Gainesville, FL, U.S.A. • [saurabh\[dot\]neuroai\[at\]proton\[dot\]me](mailto:saurabh@neuroai.proton.me) • saurabhr.github.io

[GitHub](#) • [Blue Sky](#) • [X](#) • [ORCID](#)

Ph.D. Cognitive Neuroscientist | Cognitive and Machine Psychology | Human-AI Alignment | NeuroAI

EDUCATION

Ph.D. Psychology — Behavioral & Cognitive Neuroscience University of Florida, USA | 2025

Dissertation: [Reality Monitoring in Humans and Artificial Intelligence](#)

M.Sc. Cognitive Science University of Allahabad, India | 2018

Thesis: [Intentional Binding in Future-Directed Intentions](#)

B.Sc. Physics Birla Institute of Technology, Mesra, India | 2016

TECHNICAL SKILLS

AI/ML & LLMs: LLM evaluation and hallucination-detection pipelines, agentic workflows, retrieval-augmented generation (RAG), prompt engineering; PyTorch, HuggingFace, LangChain, LangGraph, Pydantic, scikit-learn

AI-Assisted Development: Claude Code for research infrastructure, documentation, and testing — built out Psych Scanner (docs, unit tests, custom-agent support) and migrated MetaSignal’s documentation to Read the Docs

Interpretability & Representational Analysis: linear probing of internal representations across layers and time, encoding models, psychological network analysis comparing representational structure across human and model populations, multivariate signal decoding (MEG/EEG with MNE, fMRI with Nilearn/SPM), large-scale predictive modeling on UK Biobank resting-state fMRI

Statistical Modeling & Evaluation Design: Bayesian hierarchical models (PyMC3, brms), signal detection theory, generalized mixed-effects models (lme4), multinomial processing trees, network analysis (bootnet, qgraph), causal and metacognitive modeling

Data Engineering & MLOps: Python, R, MATLAB, Bash; pandas, NumPy, Git/GitHub, SLURM/HPC, containerized environments, large-scale behavioral data collection (Prolific, Qualtrics, PsychoPy/JS)

Visualization & Communication: seaborn, matplotlib, plotly, ggplot2, tidyverse — publication-ready figures, dashboards, stakeholder reporting

RESEARCH EXPERIENCE

Researcher — AI for Biomedical Health Outcomes 2026

University of Florida, Gainesville, FL

- Build agentic AI systems (planning, reflection, tool use, multi-agent coordination) for clinical and medical decision-making, and develop instructional material contributing to UF’s [#1 AI-readiness ranking among large public universities](#) (AIREDEX, 2026).
- Engineer reproducible research pipelines (PyTorch, LangChain/LangGraph, Pydantic, SLURM/HPC) that run and evaluate agentic workflows at scale.
- Co-develop UF’s Master’s-level curriculum on Data Science and Agentic LLMs for UF AI for Biomedical Health Sciences (AIBHS); built and maintain the [AIBHS Faculty Hub](#) and [AI Passport Impact Project](#) sites — 20 hands-on modules spanning Foundations, Clinical Application, and Basic Science tracks.

Research Assistant 2025 – 2026

Dr. Andreas Keil's Lab, University of Florida, Gainesville, FL

- Continued development of [Psych Scanner](#), advancing it from version 0.1.0 to version 0.3.0.

Graduate Researcher 2020 – 2025

Dr. Brian Odegaard's PAC-Lab & UF Department of Psychology, Gainesville, FL

- Discovered that LLM source-attribution accuracy reverses under episodic memory delay, tested across 2 experiments and 6 transformer-based LLMs (Gemma3, Llama3.3, Llama4), a hallucination-relevant failure invisible to single-turn benchmarks.
- Found that corrective feedback produces two distinct metacognitive failure modes and that failure severity tracks active, not aggregate, parameter count, publishing the result as a preprint (arXiv:2607.23927).
- Designed and ran matched experiments with 100+ human participants and parallel LLM simulations, to generalize reality monitoring within human and LLM populations across task constraints.
- Applied neuroimaging decoding methods:
 - [MEG temporal generalization](#) to decode seen versus imagined experience
 - [fMRI linearizing encoding models](#) to predict fMRI response from image memorability in the NSD dataset
- Built psychological network models from 2,743 human participants and 6 LLMs (12B-272B parameters), showing human representational structure replicates across populations ($r = 0.31-0.93$) while LLMs fail to reproduce it at any scale, suggesting a world model can be characterized purely from the structural relationships between internally generated experiences in imagination and memory.
- Across these studies, LLMs showed distinct failures in knowing and accurately reporting their own knowledge, including at the largest scales tested (272B parameters) — a gap directly relevant to trusting and monitoring more capable future systems.
- Authored [Psych Scanner](#), an open-source Python framework for running LLM cognitive experiments at scale.
- Mentored 7 undergraduate researchers and taught a full segment of Physiological Psychology.

Research Assistant 2019 – 2020

Center of Behavioral and Cognitive Sciences, University of Allahabad, India

- Found stronger intentional binding, a measure of sense of agency, for predictive intermediate outcomes than non-predictive ones, replicated across three delays (300/500/700ms) and two contingency levels; published as an [OSF preprint](#).
- This construct, monitoring one's own actions, now underlies how agentic AI systems track and self-correct across multi-step plans.

Research Assistant 2018

Homi Bhabha Centre for Science Education, TIFR, Mumbai, India

- Contributed statistical analysis for Touchy-Feely Vectors (TFV), a gesture-based tool for teaching vectors, piloted across 266 grade-11 students (3 experimental, 3 control classrooms); the experimental group reasoned differently about vectors and showed higher engagement. Published in [IEEE T4E 2019](#).

- Contributed statistical analysis for a 3-year field study of TFV (135 control vs. 131 experimental students), finding it improved model-based reasoning in stronger students and engagement in average ones. Published in the [Journal of Computer Assisted Learning](#), 2021.

AWARDS & FELLOWSHIPS

- 2025 — College of Liberal Arts and Sciences Travel Award, University of Florida
- 2025 — Threadgill Dissertation Fellowship, University of Florida
- 2024 — Scott O. Lilienfeld APS Travel Award, Association for Psychological Science
- 2024–2025 — UF Department of Psychology Travel Awards ($\times 4$)
- 2020–2025 — Graduate Student Fellowship, UF Department of Psychology
- 2016–2018 — Graduate Merit Scholarship, Centre of Behavioral & Cognitive Sciences, University of Allahabad
